

PRIVACY POLICY

Tanjiblocks mission is to use real market data to make it fun, shareable and accessible to anyone. Tanjiblocks is a free to play betting and trading app for the cryptocurrency market. So as to complete its mission, the website tanjiblocks.com and the web application app.tanjiblocks.com are required to collect some personal data from its users. Tanjiblocks website and application are creations of the SAS Sumino Blockchain.

SAS Sumino blockchain representing Tanjiblocks is a company based in Villa Monte mare route superieure de Cardo, 20200 Bastia, France, Corsica registered at the "Registre Du Commerce et des Sociétés" - RCS - of Bastia Corsica France under the number 91069923000017.

We care about the protection of your personal data, taking this into account, we do not use your personal data for external purposes outside of our website or web application. We do not sell your personal data to third parties.

We collect personal data about you and protect them in accordance with the "GDPR" applicable in France since 25th May 2018.

To complement the current privacy policy and obtain more information about our services and about terms that are not defined in here, feel free to read our [Terms of Use](#).

Personal Data collected and hold

- Analytics

The services contained in this section enable the Owner to monitor and analyze web traffic and can be used to keep track of User behavior.

Google Analytics, Hotjar Limited

Google Analytics is an analytics service provided by Google LLC

Hotjar is an analytics service provided by Hotjar LLC

These services are designed for website and web application analytics and can collect various information about your desktop / phone, highlighted in the Google Analytics and Hotjar privacy policy.

Personal Data processed: Cookies; Usage Data, IP address.

- Identification data

Email, password (fully encrypted), username

Third party APIs like Google Connect, X (Twitter) connect, Discord Connect, Coinbase connect are also used to create an account for users using their email address. We also allow users to connect using Metamask, a Web3 wallet, in this case, we only collect the public Web3 address located on Ethereum Blockchain.

Identification Data is fully encrypted and not sold for any commercial purpose.

How do we get the information, and why we have it ?

Analytics :

We collect those data by using a tracking code located in our website and web application. The main goal for us is to understand the user's usage and identify bugs and improvements to be made so as to make the user's experience better. This data is kept for 2 years.

Identification data :

We collect identification information from users when they sign up so as to use our web application.

- Identification data is indispensable for us to allow someone to use our service. User's data is kept for the lifetime of your account. In case of an inactive account for 2 years, your personal data will be deleted. In addition, your data may be archived for evidentiary purposes for a period of 5 years.
- This data is also useful for commercial purposes so as to retain user's interest, send our latest news and develop business relationships. The data is kept 3 years after the last contact.

Who has access to your personal data ?

1. Our staff ;
2. Our subcontractors: hosting provider, chat tool, platform analysis and administration provider, bug management provider, newsletter sending provider, our product launch provider, contests, our payment service providers, audience measurement provider, customer request management provider;
3. The service providers we use to deliver personalized advertising (Facebook Ads,, Google Ads, Snapchat, Tik Tok, Twitter, Cointraffic);

Do we share your data outside of the European Union ?

User's data is kept and stored for the duration of the processing on the servers of HEROKU located in the Netherlands and MongoDB located in Dublin and Amazon Web Service located in Europe Paris

As part of the tools we use (see article on recipients concerning our subcontractors), your data may be transferred outside the European Union. The transfer of your data in this context is secured using the following tools:

- either this data is transferred to a country that has been deemed to offer an adequate level of protection by a decision of the European Commission;
- either we have entered into a specific contract with our subcontractors governing the transfer of your data outside the European Union, on the basis of standard contractual clauses approved by the European Commission;
- or we have recourse to the appropriate guarantees provided for by the applicable regulations.
